

## Møde i Professorsammenslutningen

Dato & Tid: Torsdag d. 27. september 2012, kl. 15:30 - 17:30

Sted: Rigshospitalet, Teilum Building, Auditorie A

Bemærk: Mødet vil også blive annonceret som et RH kollokvium.

---

### Symposium: Databases for clinical research - the next quantum leap

Moderator: Professor Jens Lundgren

Programme:

- Welcome, Professor Bente Klarlund Pedersen, Copenhagen University Hospital/ Rigshospitalet (5 min)
- International database collaborations, Professor Bruno Ledergerber, University of Zürich (20 min)
- The new national platform for research using databases, Executive Vice President Mads Melbye, SSI (20 min)
- Clinical databases – roles and responsibilities for conduct, financing and output, Medical Director Paul Bartels, Region Midtjylland (20 min)
- Example of innovation using established databases – the MATCH programme, Ph.d. student, Caspar da Cunha-Bang, Rigshospitalet (10 min)
- Panel discussion (45 min)

*Rationale:* New electronic structures collating data used in routine care plus innovation in data management will revolutionize the ability of health professionals to create and analyse large and comprehensive data structures for use in clinical research, evaluate quality of care and finally use these tools to improve comprehensive care.

*Objectives:* Review contemporary efforts aimed at creating such structures nationally and internationally. Outline a perspective on innovative potential of these efforts. The vision for the meeting is to create a network among professionals with expertise in this area, with a follow-up workshop to facilitate future progress.

Pfv. Bente Klarlund Pedersen (fmd.)
