**Location:** Auditorium 1, Rigshospitalet  
**Invited:** All, irrespective of connection to RH  
**Responsible:** Rigshospitalets professorsammenslutning

---

### RH Kollokvium: Personalised Medicine

Personalised medicine, a strategy based on individual phenotyping of profiles rather than the long established 'one-size-fits-all' approach identifies elements that predict the individuals' response to treatment and their predisposition to disease. There is broad consensus to focus on innovative research to accommodate this vision. **The faculty brings in expertise for multiple angles, providing you with a comprehensive overview of the various aspects and challenges that personalised medicine poses. For more details on this topic, go to: <http://www.esf.org/index.php?id=7988>**

**Welcome.** Prof. Bente Klarlund Petersen, chair of the board of "RH's professorsammenslutning"

Program: (Moderators Prof. Liselotte Højgaard, RH, KU & DTU; Jens Lundgren, RH, KU)
