

Biographical sketch Christoffer Johansen, Denmark

Born

February 15, 1955

Address

8 Otto Brandenburgs Vej, 2450 Copenhagen SV

Education

1986, MD; 1994, PhD; and 2004, Doctor of Medical Sciences – all degrees from University of Copenhagen, Denmark.

Current Position

2018 Professor in Cancer Late Effects, Rigshospitalet, University of Copenhagen

Current honorary Positions

2015 Consultant, National Board of Health; Non-Ionizing Radiation and Health.
2016 Honorary Professor (five years), University of Leipzig, Germany
2017 Honorary Professor (five years), University of Hamburg, Germany
2019 Honorary Professor, Deakin University, Melbourne, Australia

Major achievements:

I initiated, established and headed the first department of psychosocial oncology applying epidemiological methods at the Danish Cancer Society Research Center. The research aimed at evaluating how the mind may cause cancer, the effect of a cancer disease on psychosocial outcomes and interventions to improve psychosocial outcomes in cancer survivors. In parallel I worked within electromagnetic fields and health risks as well as genetics in glioma.

I am currently heading the CASTLE project (granted 2018 – 2022) affiliated with the oncology clinic at Rigshospitalet focusing on cancer late effect research.
